

Engineering Work Alterations

August 2025

Updated 3/8/25

NATIONAL SUMMARY

Nothing to report at the time of posting.

FREIGHTLINER

The service alterations summarised below are for those routes, which Freightliner class 90s operate on.

West Coast Main Line

WCML / Scotland / Midlands / South / NW England:

- Saturday 2nd August to Tuesday 26th August: Greek Street blockade via Stockport -. All lines blocked inclusively to replace a road bridge. Diversions via Heald Green and other routes. This should not impact on the operations of Freightliner intermodals to and from Trafford Park with the exception of minor re-timings and delays. The route via Macclesfield, Stoke and Stone is also shut too.

There were no other known alterations to report on at the time of publication. However, engineering work does take place on various sections of the WCML during the week and at weekends at short notice. It is advisable to check real-time data sources for specific trains on specific days just to be sure that the train you're looking for is a runner or diverted.

East Anglia / GEML

There were no other known alterations to report on at the time of publication for the East Anglia route affecting the operation of Class 90s. However, engineering work does take place on various sections of the GEML during the week and at weekends at short notice. It is advisable to check real-time data sources for specific trains on specific days just to be sure that the train you're looking for is a runner or diverted.

DB CARGO

WCML / Scotland / Midlands / NW England:

Alterations for DB Cargo are no longer reported for the time being.
