

Engineering Work Alterations

September 2026

Updated 1/9/26

NATIONAL SUMMARY

Nothing to report at the time of posting.

ALL OPERATORS INCLUDING FREIGHTLINER

The reported alterations below focus on railway corridors which are operated by class 90s for Freightliner, but these alterations also apply to other operators who do not use Class 90s too.

West Coast Main Line

There were no other known alterations to report on at the time of going to press. However, engineering work does take place on various sections of the WCML during the week and at weekends at short notice. It is advisable to check real-time data sources for specific trains on specific days just to be sure that the train you're looking for is a runner or is diverted.

East Anglia / GEML

There were no known alterations to report on for September at the time of going to press. However, engineering work does take place on various sections of the GEML during the week and at weekends at short notice. It is advisable to check real-time data sources for specific trains, on specific days just to be sure that the train you're looking for is a runner or is diverted.

DB CARGO

WCML / Scotland / Midlands / NW England:

Alterations for DB Cargo are no longer reported for the time being.
